

# Adjustable exhaust anemostats KW

## Dimensions

## Description

The KW exhaust valve is designed for installation in the ceiling, in the wall or directly on the duct using a special frame RM. The KW valve has continuously adjustable air flow via a rotating central disc. The selected slot is fixed using a locking nut. The special design of the valve guarantees low noise level, as well as speed and ease of installation.

**Material:** galvanized steel sheet  
**Finish:** powder coating RAL 9016 high gloss  
**Standard color:** white

**Example of designation**  
Product code: KW - aaa  
type \_\_\_\_\_  
Ød \_\_\_\_\_

## Technical data

### Parameters

The flow volume  $q(l/s)$   $a60 m^3/h$ , total pressure loss  $P_t(Pa)$  and acoustic pressure level  $L_A(dB(A))$  can be determined from the graph.

### Pressure loss, $P_t$

The graphs depict the total pressure loss  $P_t(Pa)$ .

### Acoustic pressure level, $L_A$

The graph shows the acoustic pressure level  $L_A(dB(A))$ . The noisiness value is presented for room attenuation of 4dB, which corresponds to room reverberation zone attenuation with  $10m^2$  SABINE room acoustic absorption.
